

Welcome

**Brick and mortar asset
ownership facilitated by
digital currencies.**

Existing Challenges

Portfolio Diversity – A large number of people are amassing wealth in cryptocurrency without thinking of bearish times, other words, keeping all their eggs in one basket.

The Home Closing Process – On average this process can take 30 days or even more completing tasks that could be easily automated for better transparency between buyer and seller.

Paperwork – The delay in closing is owing to the fact that due diligence has to be done on existing paperwork, physical print outs bear a huge amount of risk poised by the ease of manufacturing counterfeits which often leads to disputes in sale completions.

Solution

A blockchain-based asset trading platform with real time settlements.

- Quick payments with cryptocurrency verified in minutes.(Acquaint Token)
- Diversification gateway for cryptocurrency holders without exchanging back to fiat, thus avoiding a double tax hit.
- Immutable records including title deeds transfer and house repairs lodged on the blockchain with the distributed ledger system instantaneously rules out need for paperwork.

Market Validation

Global Property Value

USD \$220 Trillion

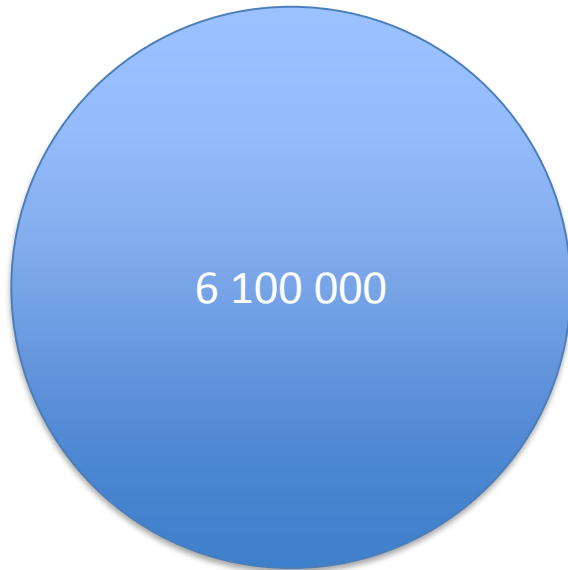

Cryptocurrency Market Cap To
Date

USD \$525 Billion

Only 0.3% of the total
cryptocurrencies in
circulation represents
physical asset backed tokens.

Market Size

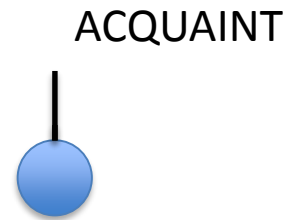

Residential Property Sold in the U.S in 2017(YTD).

Properties and Developments Listed for sale in cryptocurrency. (World-wide)

Competitive Advantages

1st to Market.

Among other things, this enables us to establish strong brand recognition and customer loyalty before other entrants to the market arise

Paperless Settlements

By going full on digital, we rule out paper settlements which are prone to fraud, replaced by immutable digital signatures.

Cross-boarder investments.

Investments in different countries are made seamless with Virtual Reality interaction, the need to travel diminished.

Near zero commissions

Traditional real estate agents charge sellers up to 7%, our 1-2% spread will act as a marketing tool for more listings on our site.

Instant Settlements

Cryptocurrency payments dramatically reduce the home closing process from 30+ days to within minutes, funds released to seller after new title deed generation on the blockchain.
